

## INSTITUTIONAL RECOMMENDATIONS

The new Erasmus+ programme will bring about an increasingly diverse student mobility landscape. This means that Higher Education Institutions (HEIs) have to rethink their internationalisation strategies and mobility portfolios in order to maximize the benefits of internationalisation, notably at student level.

Based on the findings of the first three intellectual outputs, the project team has designed institutional recommendations. They are aimed at Higher Education Institutions in order to improve institutional strategies and practices regarding mobility.

The report also contains a Glossary of terms with basic terms of international student mobility and cooperation.
